This error code indicates the mechanical malfunction in the printer. However, this error can be resolved manually with the help of guidelines which a user can fix through it. But, in case you find it hard to solve the issue then take the help from Brother Printer Support.

## **HOW TO RESOLVE THE ERROR 50 IN BROTHER PRINTER?**

At first, you need to stop the uninterrupted service from your brother printer by removing the error 50. The following guidelines are:

At first, transfer all the faxes to an alternative fax machine. This can be done when the faxes will be removed and automatically it will remove to Machine Memory.

While you open the scanner cover, first make sure you close the document cover. After that, you need to remove the piece of paper that has been stuck inside the machine. Next thing you do is opening up the jam clear cover from the back of the printer, after doing this release the lock and then shut down the scanner cover.

In the last step, unplug the printer and after some time, plug in your brother printer back and try to print again. These are some of the guidelines, through which you can solve the issue of error 50 messages from your brother printer. If in case, these guidelines do not help you then you can take the help from Brother Printer Support.
