

How To Wrap Text In Google Sheets

If you have text in your Google Sheets cells that exceeds the width of the cell, it becomes difficult to read and comprehend. This article is about how to deal with overflowing text in Google Sheets cells, which can make the spreadsheet messy and hard to read.

Hence, in this guide, we will show you how to wrap the text in Google Sheets so that it fits neatly within each cell. This will ensure that your data is well-organized, visually appealing, and simple to understand.

Let's Get started

Here is how you can wrap text on Google Sheet through the following various steps:

#1 Google Sheet Text Wrapping From ToolBar

The easiest way to wrap your text from Google spreadsheet is from the toolbar itself. You will find the option on the right hand side of the sheet display. Here's how:-

- Select the cell or cells to wrap text. You can also select an entire row, column or entire spreadsheets to wrap text.
- Select the text wrapping icon from the toolbar.
- Click on it and select the middle option icon that says Wrap.
