

Attendance Management Software

[EZHRM](#) is an online attendance management system that helps the company to keep a track of the attendance of all the employees. Majorly, the methods used are – Android applications & Web applications. It is a mobile-based attendance system through which attendance can be marked with a selfie. Online attendance can be marked using an IP address and Geo-Fencing. EZHRM is a biometric attendance software that is used to sync the fingerprints and faces whenever an employee goes in and out of the office, the same data is recorded in the software. After that, employees' first and last punch is taken into consideration to see the total work hours in a biometric attendance management system.

Feature of [Attendance Management](#) System Software:

1. Automate Your Attendance Effortlessly
2. Captures Attendance from ESS Portal
3. A Scalable Online Attendance Management System
4. Upload Your Excel Attendance With No Troubles
5. Start your day with a morning selfie
