

Facility management services in Mumbai

Projection of the Facility Management Industry

The facility management industry is expected to grow at a rapid pace in the forecast period of 2021-2026, growing at a CAGR of 20% to reach a value of around USD 406 billion by 2026."

Businesses in India have been unorganised across the industrial, commercial and retail sectors. As we are witnessing a steady movement towards corporatisation of these sectors, the demand for [facilities management](#) is on the rise.

We at SILA, are not only working towards fulfilling these demands but are also ensuring to provide seamless high quality services - backed by technology and innovation for better service delivery.
