

Best In Vitro Diagnostic & Point Of Care Testing Medical Device Manufacturer

Sensa Core Medical Instrumentation Pvt Ltd Is [India's fastest growing In Vitro Diagnostic & Point Of Care Testing Medical Device Manufacturer](#) delivering a wide range of analytical and diagnostic analyzers, Reagents & Spare Parts that are at par with global standards. We manufacture products with state of the art technology which is supplied to a large number of hospitals, pathological labs and patients worldwide ensuring the highest quality and reliability.

Sensa Core's Range Of In Vitro Diagnostic Medical Devices - ABGEM

Sensa core is a leading manufacturer of a wide range of blood gas analyzers that are highly advanced with power packed features that are exclusively designed to meet the requirements of modern laboratories efficiently and effectively. With 16 years of rich experience and strong research and development team, we have emerged as a top player in [manufacturing the finest blood gas analyzers](#) with state of the art technology that delivers exceptional analytical performance.

ST-200 CC Arterial Blood Gas Analyzer - ABGE

Sensa Core's Range Of In Vitro Diagnostic Medical Devices - Electrolyte Analyzers

Sensa core [offers a series of electrolyte analyzers](#) which comes with highly efficient functionality with the presence of all the essential electrolytes like sodium, potassium, Ionized Calcium, Lithium, pH and Chloride with calculated parameters in whole blood, serum, plasma, and urine. And most of them include reagents, electrodes, peristaltic pumps, and sample probes. Sensa core Electrolyte Analyzers are completely automated, microprocessor controlled and use the latest ISE technology.

Sensa Core's Range Of Point Of Care Testing Medical Devices

Gluco Spark - Blood Glucose Meter

Gluco Spark is India's first, next-generation, highly advanced ultra-low volume glucose monitoring system available at affordable prices. This glucometer works on advanced biosensor technology and uses only 0.5 microliter sample volumes and gives results in 5 sec.

Lacto Spark - Blood Lactate Meter

Lacto Spark measures blood lactate very quickly on a very small drop of blood. This results in a virtually painless, yet fast and accurate blood lactate test. Lacto Spark is a hand-held lactate analyzer that requires just 0.5 μ l of capillary blood and returns results in 5 seconds.

Hemo Spark - Blood Hemoglobin Meter

Sensa Core's Hemo Spark is a point of care testing medical device that is used for quantitative testing of total hemoglobin in the blood. It is unique among the most portable and affordable hemoglobin meters which are user-friendly and reliable to measure hemoglobin levels in the blood.

Know More

Our line of work does not end here. We are also a premier alternative manufacturer of reagents & consumables for blood gas, electrolyte analyzers. We are also providing OEM & ODM services for clients across the globe. Learn more about us @
