To open Sky De you must the new version of cccam (**CCcam 2.3.8**) & for **OSCAM you need version 11517**.

we are very happy to be the first cccam & IPTV provider that found a solution that works for CCCAM using version CCcam 2.3.8 (this is a great option for our customer that can't switch to OSCAM).

for OSCAM users your reader should look like this:

[reader]
label = HOSTNAME_SERVER_OR_IP
protocol = cccam
device = HOSTNAME_SERVER_OR_IP,12555
user = xxxxxx
password = xxxxx
inactivitytimeout = 30
disablecrccws_only_for =
0500:030B00,050F00;098C:000000;09C4:000000
group = 1
blockemm-unknown = 1
blockemm-u = 1
blockemm-s = 1
blockemm-g = 1
cccversion = 2.3.2
ccckeepalive = 1
audisabled = 1
