

Google Drive Management

Google Drive Management

Patronum allows IT administrators to see Google Drive in a whole different way. It gives Google administrators more control over users' Google Drive folders and files. With Patronum managing Google Drive feels more like you are managing a local filesystem with all the power and control IT administrators require. It also provides better remote assistance. Apart from that, **Google drive management** makes it easy to assist users to maintain a structured Google drive environment by moving their files and folders for them remotely.
