- Hill-Rom Holdings Inc. (US)
- Invacare Corporation (US)
- Sunrise Medical (US)
- EZ Way, Inc., (US)
- GF Health Products, Inc. (US)
- Joerns Healthcare LLC, (US)
- Medline Industries, Inc. (US)

- Gendron, Inc. (US)
- Hill-Interson Corporation (US)
- Stryker (US)
- Guldman, Inc (US)
- Scintica Instrumentation, Inc. (Canada)
- Savaria (Canada)
- Drive DeVilbiss International (Germany)
- Stiegemeyer GmbH & Co. KG (Germany)
- Ossenberg GmbH (Germany)
- ETAC AB (Sweden)
- Handicare group AB (Sweden)
- Getinge AB (Sweden)
- Arjo (Sweden)
- Antano Group (Italy)
- Paramount Bed Co. Ltd. (Japan)
- Lepu Medical Technology (China)
- Edan Instruments (China)
- Leltek, Inc. (Taiwan)

[Patient Handling Equipment Market](#) size was valued at USD 12.9 Bn. in 2021 and the total Patient Handling Equipment revenue is expected to grow by 4 % from 2022 to 2029, reaching nearly USD 17.6 Bn.

Global Patient Handling Equipment Market Overview:

Several factors that support market expansion are examined in the Maximize Market Research Report. Market trends, opportunities, challenges, and factors that either help or hurt the market are all covered in the research. This section also discusses the many sectors and applications that may have an impact on the market throughout the course of the anticipated time frame. This information is based on both recent and previous trends. This section also includes an overview of production for each species from 2022 to 2029. The regional output from 2022 to 2029 is examined in this section. Costs range from 2022 to 2029 for each category, each area, and the entire planet.

Market Scope:

Between 2022 and 2029, the market for Patient Handling Equipment industry is anticipated to grow at the quickest rate. The Maximize Market Research (MMR) research analyses supply and demand trends as well as costs, prices, shares, volumes, sales, and gross profits. The manufacturing facility, production capacity, factory price, market price, and market share of each company are all examined in this MMR data collection.

Segmentation:

Medical beds accounted for a large portion of the Patient Handling Equipment market in 2021. The usage of handling equipment in hospitals, home care, nursing homes, trauma centres,

and long-term acute care facilities can be blamed for this rise. Moreover, medical bed improvements including bed frames, adjustable angles, and support surfaces for comfort and ease of mobility are to blame for shifting tastes away from standard beds and thus raising demand. The presence of electric backrests, friction and shear reduction, battery backup, and ease of assembly and disassembly are all significant features of contemporary beds that are anticipated to increase demand in the projected term.

Regional Analysis:

The MMR study covers every nation in North America, Asia-Pacific, Europe, Latin America, the Middle East, and Africa. In this study, MMR takes into account key market segments, sub-segments, and sectors. The MMR analysis analyses market size, proportion, and volume to determine how creatively a country has grown domestically. Numerous other approaches exist for expressing numbers, including volume, area, sales, market chain structures, and trends.

COVID-19 Impact Analysis on Patient Handling Equipment Market:

The COVID-19 Regulation will significantly affect societal, commercial, and labour goals between 2020 and 2021. COVID-19 urgently needs the assistance and innovation of the business community since it has the ability to destroy our civilization and way of life. COVID-19 has caused problems for foreign labourers in India. Millions of migrant workers have suffered negative effects from the embargo, including job losses, food shortages, and fear about the future.

The major objective of this MMR study is to comprehend the contemporary economy, COVID-19, and its impacts on the economy. Across all divisions, disciplines of study, and areas of competence, MMR is keeping an eye on COVID-19. Comparable data from the Maximize Market Research Report can be utilised to assess how COVID-19 has affected industry losses and growth.

Key Questions answered in the Patient Handling Equipment Market Report are:

- Which product segment grabbed the largest share in the Patient Handling Equipment market size?
- How is the competitive scenario of the Patient Handling Equipment market share?
- Which are the key factors aiding the Patient Handling Equipment market growth?
- Which region holds the maximum share in the Patient Handling Equipment market growth?
- What will be the CAGR of the Patient Handling Equipment market during the forecast period?
- Which application segment emerged as the leading segment in the Patient Handling Equipment market size?
- Which are the prominent players in the Patient Handling Equipment market growth?
- What key trends are likely to emerge in the Patient Handling Equipment market in the forecast period?

- What is the expected Patient Handling Equipment market size by 2029?
- Which company held the largest share in the Patient Handling Equipment market size?

Reason to Buy

- By determining the growth, size, top players, and market segments in the global Patient Handling Equipment Market, you may save and cut down on the time spent conducting basic research.
- highlights important business issues to help organisations rethink their company plans and establish themselves throughout a large geographic area.
- The primary conclusions and suggestions emphasise significant forward-looking industry trends in the Global Patient Handling Equipment Markets, enabling participants to create successful long-term plans to maximize market revenue.
- Create or alter corporate expansion plans leveraging significant growth opportunities in both developed and new markets.
- Examine in-depth worldwide market trends and outlook together with the market's development drivers and, to some extent, its growth restrainers.
- Understanding the techniques that support commercial interest in regards to products, segmentation, and industry verticals will improve the decision-making process.
