Note: Use special caution when working with Li-ion cells, they are very sensitive to charging characteristics and may explode or burn if mishandled. Make sure the user has enough knowledge of Li-Ion rechargeable batteries in charging, discharging and assembly before use. Always charge in/on a fire-proof surface. Never leave charging batteries unattended. We are not responsible for damage if there is any modification of the batteries/chargers in any form or shape (including pack making).

VapourIndia is not responsible for any damage caused by misuse or mishandling of Li-Ion batteries and chargers. We only recommend using Lithium Ion rechargeable batteries with a control circuit (protection PCB) to assure safe charge, discharge, etc, use of lithium ion batteries without a protection circuit is potentially hazardous.

Features and Specs for Kbox 200:

Dimensions: 3-1/4" x 2-1/4" x 7/8"
Spring-loaded 510 Contact Pin
Wattage output: 7-200W
Temperature Control : Ni / Ti / SS / Ni-chrome
Temperature Control Range: 100 - 315C / 200 - 600F
Resistance: 0.05 ohm or above for Ni/ Ti/ SS Wire
Resistance: 0.10 ohm or above for Ni-chrome Wire

LCD Display Screen
Zinc Alloy and Aluminum Alloy Construction
Requires (2) 18650 High Amp Batteries (sold separately)
Micro USB Port for DC 5V at 1.5A and future firmware updates
Micro USB Cable (sold separately)
PCB with unique serial number
10 second cut off safety feature
High temperature protection
Reverse battery protection
Short circuit protection
Low battery warning
Over-discharge protection

Product Includes:
