

Asphalt Drum Mix Plant Exporter – Atlas Technologies

Atlas [asphalt drum mix plant](#) in all aspects including superior build quality and performance. [Drum Mixing Plants](#) are available from 40 tph to 120 tph. The units are modular and build to last. Burner unit is fuel efficient and designed for optimal performance. It is also available in mobile version. We are looking to export of Drum Asphalt Plant in Sri Lanka, Uganda, Ethiopia and South Africa.

We manufacture asphalt mixing plants – drum type in capacities 40 tph to 120 tph. Capacities above 120 tph are available on request. Drum Mix Plants are designed for those contractors who are looking for a reliable machine which can serve them for years to come.

[Mobile Asphalt Drum Mix Plants](#) are ideal for road contractors who want to make high volumes of hot mix asphalt without compromising on the quality factor. Stationary Drum Mix Plant means that the customer will station the plant at one place and forget it. The plant by Atlas will then endlessly serve the customer with high volumes. Many of our existing customers do road work and sometimes prefer to sell the hot mix. The control panel's ability to store large number of mix recipes make the job easier for the asphalt plant operator. The control panel is with user friendly software making the operation smooth.

Atlas DM series of **asphalt drum mixing plant** is now more modern, complete and efficient to satisfy your needs. We always strive to make key changes in our equipment to make it more and more suitable as per your needs. Our aim is to give intelligent and efficient solutions to customers which aid in the profitability of the customer.
