

## Purple Viagra is an exceptional medicine used to treat a distressing sexual condition called (ED).

Purple Viagra tablets are composed by trusted manufacturer Fortune Health Care Ltd. This medicine helps a sexually aroused man to experience long lasting satisfaction from the act of making love. The medicine is composed of 100mg strengths. This chewable tablet suits men of all ages. Chewable formula makes it easier for sexually aroused man to experience positive results just in minutes after consumption. Sensational pills show its effective results only if consumed in presence of stimulation and 30 minutes before intercourse.

Purple Viagra 100 works extremely well in the presence of complete sexual arousal; also avoid expecting the medicine for providing spontaneous erection. Actively composed of Sildenafil Citrate, Purple Viagra pill are ideal choice for men with some severe erectile dysfunction. Medicine substantially enhances the blood flow to the penile. It not only promotes stiffer penile erection, but also helps in sustaining rigidity for longer time.

Viagra purple 100 inhibits the secretion of an enzyme phosphodiesterase-5 in order to elevate nitric oxide. When this action mechanism takes place, the overall blood circulation is increased. This way your penile organ receives adequate blood for an erection that sustains

for longer duration. Erections assisted by this medicine are stiffer and long lasting, so that you can execute sexual intercourse with great satisfaction. Purple Viagra tablets is not for men who undergo treatment with nitrates or alpha-blockers. That's because Sildenafil Citrate is not compatible with those drugs and can give rise to health complications if taken together. Also, it is contraindicated in men who are suffering end stage diseases related to heart, liver or kidney: <https://viagrapurple.com/about-us.html>

Viagra purple 100 should be taken under the direction of an experienced medical practitioner. The recommended dosage is only taken once in 24 hours. You should never exceed a single dosage of the drug in a single day regardless of a sufficiency of an effect of the drug. The drugs are mostly taken while you have not taken food to maximize its efficiency. You should also take the medication at about 30 minutes before a planned activity as the drug takes about 30 minutes to produce the required effect: <http://myfildena.com/>

Purple Viagra is one of the generic medicines that is widely used to treat sexual impotence in men. It is effective for men who often fail to get and maintain an erection even after being sexually aroused. This generic medicine boosts blood flow to the male organ to promote an erection. A prominent pharmaceutical corporation named Fortune Healthcare manufactures Purple Viagra tablets in different potencies such as 25mg, 50mg, 100mg, 120mg and 150mg.
