

Fetcher Review: The Best Accounting Software For Amazon Sellers

In this article, the author has mentioned some intriguing features of phenomenal accounting software for Amazon sellers, **Fetcher**. It will help the readers to get some prior knowledge about it.

Amazon, the world's most renowned eCommerce platform, has been on everyone's list to shop from and satisfy their clients with its services. Within a very small era, Amazon achieved success and won billions of hearts. But have you ever imagined how difficult it is for sellers to keep an accounting record of every buyer?

The number of products they ordered, the shipping charges, their returns and refunds, tracking records, etc., everything needs to be managed to avoid any conflict with the client. But, keeping a record of every order individually is quite hectic. So, here's accounting software for Amazon sellers: **Fetcher**.

What Is **Fetcher**?

Fetcher is software for Amazon sellers to check and evaluate profit analytics from their selling ratio. The software even helps the business to sell more products, input financial data, and examine your accurate metrics through PPC, promos, fees, product costs, etc.

Let's know more about it in the [Fetcher Review](#):

For now, we begin from,

The Fetcher - Jungle Scout Connection:

From 15 September 2021, Fetcher got discontinued and finally taken over by Jungle Scout. Earlier, they were two different platforms, and Jungle Scout is far more expensive than Fetcher. But, since Jungle Scout took over Fetcher, the Amazon sellers are loving it getting all the mixed features, so let's have a look at them:

Product Tracking:

The software tracks all the products their customer orders and manages them accordingly without any hassle. Through it, you can track down:

- Real-time sales
- Organize products easily
- Observe key metrics
- Export your product tracker and more.

Inventory Manager:

Inventory management is quite responsible work to carry on, as you need to maintain proper records for your inventory. It means keeping reports about the stock goods, which ones to reorder, and more. It even:

- Calculates Amazon inventory needs
- Predict FBA sales & profits
- Avoid Amazon storage fees
- Prevent stockouts, etc.

Rank Tracker:

Do you know, keywords are important in eCommerce platforms as well? Fetcher has a rank tracker, which analyzes and monitors keywords to influence listings for your competitors. The sellers get some more benefits like:

- Maximize keyword power
- View your competitor's keyword performance
- Compare keyword rank history
- Streamline your process and more.

Academy:

Apart from managing the accounting records of Amazon sellers, Fetcher has an academic side too. The newbie sellers can get educated on product research and enjoy the learning hub that has more than 130 videos. Some other privileges are:

- Lessons from Jungle Scout CEO
- Master Amazon at your own pace
- Attend live Q/A issues, etc.

Wrapping Up:

Overall, Fetcher is one of the most prominent accounting software for Amazon sellers, and we hope our readers also understand the same after reading the Fetcher Review.
