5 Ways to Detect a Phishing Email

Identifying Phishing Emails!

Phishing may be "one of the oldest tricks in the book," but it is still incredibly

effective. Identifying phishing emails has become paramount important for people to defend

against data breaches.

Check out the 5 ways you can spot Phishing emails.

1) Identifying Fake URLs

Look at the email address, not just the sender

2) Poorly Written Email's

Look for grammatical mistakes, not spelling mistakes
