- Automotive
- Education

If you wish to start a career in Cyber Security then **CEHv10**, **ECSAv10** and **CCISO** are the 3 main Certifications from **EC-Council** to consider.

[Certified Ethical Hacker | CEHv10](#)

Certified Ethical Hacker | CEHv10

CEH v10 is a course which is well known and trusted, ethical in **Hacking** Training Program which is obtained by demonstrating knowledge of assessing the security of computer systems. This program is legitimate and lawfully allows you to practice in any company which needs to access and assess the security of any target system.

Infosavvy raises the bar again for certification and training of ethical hacking programs with the all new CEH v10! This program will make you involve deeply into Hacker Mindset which will teach you how to think like a hacker, it puts you in a position where you have all the commands and knowledge in employing the **ethical hacking process**.

[EC Council Security Analyst v10 | ECSCA](#)

EC Council Security Analyst v10 | ECSCA

ECSCA training from Infosavvy provides an absolute learning progress continuing where the **CEH** program left off. This new ECSCAv10 program has updated syllabus and an industry recognized comprehensive penetration testing methodology.

Inclusive of all the above mentioned topics certifies the learner to elevate their abilities by applying these skills learned through intensive practical labs and challenges.

Various methods are covered by **ECSA** in this course which has different requirements across all the verticals. ECSA is an amalgamation of both manual and automated penetration testing.

[EC Council Certified Chief Information Security Officer | CCISO](#)

CCISO Certification is an up skill to be succeeded at the highest levels of information security. It's first of its kind training certification program aimed at producing top-level information security executives. It not only concentrates on technical knowledge but also on the application security management principles from an executive management point of view. The program consists of three committees: Training, Body of Knowledge and the C|CISO Exam. Every element of this program was developed with the aspiring CISO keeping in minds and looks to spread the knowledge of seasoned professionals to the next generation in the arena that are most critical in the growth sector and maintenance of a successful [information security](#) program.
