We want to build a brand that **improving constantly, thinking sustainably**, and **bringing awareness** to animal safe and happiness. We want to make pets and our customers happier, our community stronger, and the future a bit brighter. ✨

Kitifish num little 8

KitiFISH is another clever cat toy that moves like a genuine goldfish! Two mechanized wheels push the toy ahead and in reverse, flipping it over, turning it around and around, and washing its quill tail around, causing the kitty a deep sense of enjoyment. Differing speed makes for flighty development that will invigorate your cat's hunting nature, while two little chimes add a delicate sound to captivate the kitty considerably further.

Following 5 minutes of play, KitiFISH will stop until your cat contacts it, and afterward, recess is on once more. It runs for 30 minutes with a 30-minute USB charge.

Key elements

- Cat toy that impersonates a goldfish by swaying tail, bouncing, turning, running, and turning which invigorates your cat's interest.
- Joins streaming quills and ringers to stand out.
- Made with a safe and strong material which won't hurt your cat.
