

# Point Cloud To 6d BIM Service

A accurate way for creating as-built BIM models from a finished construction site is **Point Cloud to BIM services**. [Point Cloud BIM Service Provider company](#) enable the expansion and renovation of residential, infrastructure, commercial, educational, sporting, and mixed-use developments. For structural, architectural, and plumbing services, BIM engineers use the **point-to-BIM** approach to offer dynamic as-models of pipes, walls, slabs, facades, roof planes, and surrounding landscapes.

## POINT CLOUD BIM SERVICE PROVIDER COMPANY

- **Scan to 3D model for architectural and structural components.**
