

7 Essential *Online Dating Tips* For Women

1. Be Confident

Don't approach online dating submissively. It's scary to admit that you are "looking" for that special someone but don't forget, your blind date is auditioning as much as you are.

2. Don't Drag It Out

Why would you invest time becoming emotionally attached to someone through their writing and words if you would never click once you meet in person? Establish an interest in each other and then don't drag it out.

3. Have a Sense of Humor

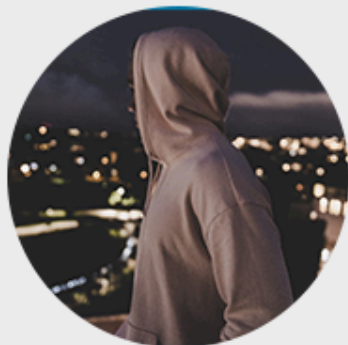

Attitude is everything. I kept a brief blog during two periods of online dating in two different states. It was the only way to keep everything in perspective and to keep my friends entertained.

4. Never Lie On Your Profile

Do not put up photos from 50 lbs ago. Do not say you don't have any kids if you really do. Do not gush that you love heavy metal when you really don't.

5. Recognize Setups

If someone said this to your face, how would that make you feel? Delete his message and move on.

6. Take a Break

Step back and take a break every so often – often you can temporarily disable your profile so that you don't continue to get messages in your absence.

7. Be Safe

I never let anyone pick me up at my house for a first date and I always told a friend when I was on a first date, even if it was just coffee.
