

## Pineapple is now available all year

Sweet, juicy pineapple has been introduced to the Polish market relatively late. Only a few had a chance encounter with this exotic fruit until recently when it became more common in stores across Poland and even abroad! Pineapple is now available all year round which makes finding fresh pineapples easier than ever before - you just need patience at first since they're not always on sale right away or maybe even come month after your order them (depending).

In recent years international travelers have started enjoying pilgrims who brought their own home-grown merchandise back from travels along Route 40 -- one such item being parrots containing colorful feathers plucked off.

**Pineapples are a delicious treat** found in the wild, but they're also an amazing vitamin C and Magnesium rich fruit. They come from plants that have tendrils or crowns on top called "leaves." The largest pineapple can weigh up to 5kg!

Pineapple is a tropical fruit that is native to South America. The fruit is grown in many parts of the world, including the Caribbean, Hawaii, and Africa. Pineapples are a source of Vitamin C and also contain dietary fiber, manganese, and copper. The fruit is often eaten fresh or used in juices and other foods.

Pineapples can be cultivated in a variety of soils, but they prefer well-drained, sandy soils. The plants should be protected from wind and excessive rainfall. Pineapples are typically propagated from crowns or slips. Crowns are the uppermost portion of the pineapple plant that contains the leaves and fruit. Slips are lateral shoots that grow from the base of the plant.

Pineapple plants can take up to two years to produce fruit. The fruits are typically harvested when they are about a year old. Pineapples are generally harvested by hand using a sharp

knife. The fruits are then transported to market where they can be sold fresh or processed into other food products.

Pineapples are a healthy addition to the diet and can be enjoyed in many different ways. The fruit can be eaten fresh, canned, or juiced. Pineapple juice is a popular beverage and is often used in cocktails. The fruit can also be used to make jams, jellies, and other preserves.
