Natural Stone Surfaces for a Nature-Inspired Kitchen

Rainforest Brown Marble For Working Tops Kitchen

Description of this Brown Kitchen Worktop:

Rainforest Brown Marble is a stunning material from India, with no two slabs of this variant ever looking the same due to its natural beauty. This is an absolutely breathtaking material that captures the majestic beauty of nature in its slab, with dark brown-red veining on an exquisitely patterned background of brown, green, grey, and white/cream tones. The intense veins appear like the roots of a gigantic aged tree, surfacing on the ground. The overall appearance of this brown worktop looks like a dried leaf pressed by the weight of pages in between a heavy book.

Application:

This majestic marble is a commendable choice for use in kitchens as backsplashes, kitchen worktops, flooring, wall and floor tiles, kitchen worktops, kitchen windowsill, vanity tops, facades, frames, stairs, decorative elements and much much more. The presence of certain minerals and their non-uniform distribution creates striking tones and dramatic designs as veins, making it suitable for residential as well as commercial projects. For outdoor work, it requires to be treated because it can be negatively affected by the weather, which can cause it to become matte or crack as a result of the cold or acid rain. Given its average wear coefficient, it is recommended for low- to medium-traffic floors and stairs.
