

Why should you replace plastic jars with Ceramic jars to store your homemade pickle?

Getting bored of routine meals and subsequently bringing chutneys and other dips to the rescue is something most of us have done. Every Indian meal is incomplete without some chutneys or pickles. Infact, for some people, they are as staple to the Indian cuisine as pulses or rice. Your delicious homemade pickles and dips can add flavor to every bland meal, which is why it needs to be stored in the most healthy way possible.

Do you feel your favourite 'achaar' is getting spoiled in plastic and copper jars?

Well, we have a 'vichaar' ready on the shelf for you, a ceramic [pickle jar set for the dining table](#), available online, is gonna be the go to solution
