

# Ways to Protect Your Company from an Expensive and Embarrassing Cyberattack

## INTRODUCTION

Cyber-attacks have moved to the front page of the news. The criminals behind these attacks are building more sophisticated profit-oriented organizations, even investing in AI (Artificial Intelligence) and talent to keep a few steps ahead of the defense.

A disciplined, continuous, and thoughtful approach to protecting your enterprise systems is a requirement. The steps outlined above are a good baseline to build or enhance. Email and vulnerabilities play a significant role in cyber-attacks. . For businesses with smaller IT teams finding a partner that can provide expertise and execution without having to build their own team is a good starting point.
