

Best Construction Management schools 2022

As per the labour statistics, the job outlook for construction management is set to grow 11 percent from 2020 to 2030, which is a much faster rate compared to most industries. It is not a mandate to have a formal degree from a construction management school or a certification to enter the field, but it can surely set you apart from other candidates and help you advance in your career more quickly.

To find the best construction management schools, we looked at numerous aspects such as costs, curriculum, accreditations, reputation, and alumni to name a few before choosing our top picks.

The Best Construction Management Schools of 2022

RICS SBE, Amity University

[RICS School of Built Environment](#) is an industry-led academic institution, established in 2013. It is one of the best colleges for construction management for students aspiring to work in the real estate, infrastructure and construction sectors. They offer specialized programmes endorsed by the global professional bodies, and industry leaders in the trading along with the Ministry of Urban Development, Government of India.

What matters more than anything else is the seamless convergence of skill development to the academic focus, if one follows the mission statement of the institution. They offer India's first and only RICS accredited MBA programmes. In fact, their [MBA in Construction Project Management](#) is India's first course to get dual (RICS & PMI-GAC) accreditation.

Their unique MBA in CPM prepares you to excel as a project manager, working in a team, often as a team leader. You will be able to lead teams of specialists including architects, structural engineers, electrical engineers, sustainability experts and finance experts.

An MBA in Construction management will help you with the responsibilities of planning, executing, monitoring, controlling, and closing the construction projects. Construction managers play a lead role in managing the project team and resources that ultimately lead to the success or failure of the project.

The course duration intersects with ten knowledge areas of PMI viz. integration, time, scope, cost, human resources, quality, communication, risk procurement, and stakeholder management.

An MBA in Construction at RICS SBE prepares you to play a key role throughout the delivery process of a construction project. It provides you with the capability to apply recent cutting-edge technology in real-world projects.

The leading institution stands with a placement record of 95% & more. SBE students are in huge demand within the industry as they are transformed into techno-managers.

Symbiosis Centre for Management and Human Resource Development (SCHMRD)

The core values of the institution hover around the concept of bringing practical wisdom from management cubicles and such a curriculum is what the construction management segment requires.

Today, the corporate world wants competency than academic excellence. They need professionals who can perform innovative management and possess leadership qualities. The corporate world has moved on from accepting students well-versed in tame pedagogy to

professionals who are trained to adopt and adapt learning from the globe over to help solve local problems with intuitive alacrity. And that is what SCHMRD believes in.

Adani Institute of Infrastructure (AII)

As the name suggests, the institution has the infrastructure built into it which implies that its core values revolve around educating young people to become future-ready players in the industry of their choice, including construction management.

It is one of the top construction management colleges that provides a promising alternative for a student aspiring to enter the construction management sector that is poised to accept professionals.

It is obvious that students with matured managerial acumen woven through a matrix of technological prowess alone can be market-ready for accepting the massive challenge that this sector has to offer.

National Institute of Construction Management and Research (NICMAR)

NICMAR has been set up as a non-profit organization with the specific aim of participating in activities supporting awareness, science, expertise, and training at all stages of construction and other associated industries. They provide post-graduate programmes in construction management and real estate.

School of Planning and Architecture (SPA)

SPA is backed by decades of effective training that the construction management sector requires. For the uninitiated, SPA, which was earlier the Department of Architecture of Delhi Polytechnic, before changing its name in 1959, has been in existence since 1941.

Aspirants from across the nation dream to be alumni of this top construction management institute. The school provides specialized education across multiple verticals to ensure that the skill gap in the construction sector is filled with new-age professionals who can think of dynamic ideas to propel the development of the construction management sector as well.
