

How To Destabilize Enemy Nations On A Tight Budget (Explained)

Many, that have studied the us history, and government, are incredibly concerned, since they feel, in lots of areas, our Constitution, and, thus, our nation is under attack! Regardless of one's political beliefs, or whether one agrees with/ supports, the existing President, or opposes him, we have to understand/ realize/ recognize, what taken, or avoided (that ought to have already been taken), routinely have longer - reaching ramifications, to return. It can be far different, to guide someone on specific positions, instead of look one other way, when President Mr . trump, decides to proceed, with hardly any respect, because of the norms, or, proceed, as they wishes, inspite of the apparent violations of either regulations, or our Constitution. America's Founding Fathers seemed to recognize the requirement, for checks - and - balances, and make sure, no one individual, had unilateral power, and/ or control. Because of that, they created, precisely what is known, as, the Balance of Powers, with co - equal branches of presidency. They specifically provided specific limits on the Executive Branch, with, for example, the so called, Strength of the Purse Strings, in the hands of the Congress. Moreover, our Courts were meant to interpret, and find out disputes, as reported by the basic principles with this nation, including, liberty and justice for those, and the rights guaranteed, from the Bill of Rights. Keeping that in mind, this article will try to briefly, consider, examine, review, and discuss, why we have to demand, we never permit, anybody individual, some thing, as if, he is above the law!

The Wall

No discussion of the Balance of Powers, could be complete, without beginning, with President Trump's requirement for his southern wall. There are many issues involved, including costs/ expenses, effectiveness, and its particular symbolism, but the rule of law, proclaimed, Congress had the ability to approve or disapprove the expenditures, and, refused to allow, anywhere near, what this President demanded. He, then, declared a nationwide Emergency, which many Constitutional experts, declare is unconstitutional, since there continues to be no proof of a true emergency. Most, rather look at this, a finish - around, where Trump is trying, to adopt funds, granted elsewhere, and employ them, on his symbolic wall! There are presently, over 20 lawsuits, filed, and, hopefully, our Courts determine, the rule of law!

Russian Investigation/ Mueller

The administration of Mr . trump, has been online under, a little bit of a cloud, since its onset, because, he won the Electoral vote, while losing the widely used vote. Then, there was many reports of foreign interference, for the reason that election, including hacking, etc. As the President has known as the Mueller investigation, as being a Witch Hunt, it has, currently, indicted over 30 people, and clearly, indicated, the Russians interfered, together with the election. While, we do not know, today, nor may we, in the future, uncover, the thing that was discovered, in - full, each side how the Attorney General, is handling its release, to - date, is suspicious.

We are in uncharted waters! Wake up, America, and protect your rights, and the specific protections, with the U.S. Constitution!
