

# Polishing Your Granite Countertop

Granite is one of the hardest natural stones upon earth. Commonly installed in homes as kitchen or bathroom countertops, granite is a durable material that can withstand years of usual wear and tear. Professionally unquestionable and properly maintained, countertops can tally and [countertop fabrication Atlanta](#) accumulation the value of your property and pay for you many years of practical use and enjoyment.

## Preventive Maintenance

To save your countertops looking later new, avoid setting glasses or cups directly upon them. Use coasters to prevent stains. Remember, heat can also stain granite, appropriately accomplish not place warm pans and pots directly on them.

Quickly handle any spills, but avoid helpfully wiping them off; instead, dab them subsequently a abstemious towel to prevent the spill from spreading to a greater area. Avoid feel citrus fruits

or any alcohol products upon granite. The chemical wave between mordant and the calcite in the granite can cause the surface to anemic or etch.

If your countertops look like they could use a good cleaning, pull off not use regular household cleaners. Most household cleaners have high pH solutions (like ammonia-based window cleaners) or are conveniently too abrasive which colorless or damage the surface of your granite countertops. choose a product that has a neuter pH level.

### Cleaning your Granite Countertops

Most granite countertops are sufficiently well solid since they are installed in homes. Professional installers usually suggest resealing granite countertops all three years. To incite granite save its pretty shine, however, it is indispensable to polish it regularly. This is easily done.

Start out by cleaning the countertop thoroughly; this includes removing any stains. recall not to use abrasive cleaners or cleaners gone a high pH level. permit the surface to temperate thoroughly. Then, apply a fine mood granite polish evenly on the entire surface. Use a clean cloth to buff the surface, and you're done! Repeat as often as needed or as recommended upon the label of the granite polish. Using a microfiber cloth (or a cloth diaper) is suggested as there is less unintentional of excess fibers inborn left upon the counter.

Installing a countertop in your house is an investment in your property, as it enhances any room and complements an infinite variety of dcor. It is plus a expensive investment. By making distinct your granite countertop is properly sound and by instinctive careful of spills and stains, a simple buff and polish should assist keep your granite countertop (and your investment) protected and looking fine as new.
