

FreeMax Marvos T 80W Kit

[FreeMax Marvos T 80W](#) Kit is an all-in-one vape pen-style pod mod kit. At the same time, it is also the World's first pod mod with a glass pod option (sold separately). The manufacturer claims to be better than the best sub-ohm tank. Marvos T inspired Cloudchaser with a complete program. Inspired by Freemax's world-known Fireluke Series, [FreeMax Marvos T 80W Kit](#) will come with its extraordinary performance. The Marvos T all-in-one kit includes Marvos T battery and Marvos DTL Pod. It also includes two coils (DTL) and a matching 810 drip tip to ensure good comfort. It is made of high-quality materials and has a silky luster, which looks extremely noble. In addition, thanks to its ergonomic design and convenient grip design, the kit can be placed comfortably and safely in the hand. [Marvos T](#) is powered by a 3000mAh built-in battery, with a Type-C port, capable of 2A fast charging, providing an all-day going power and 90 minutes charging time for maximum. Coupled with the newly upgraded FM 2.0 chipset designed for safety, it can achieve an output of 80 watts. Click the ignition button three times to adjust the wattage, and the LED light attached to the button will indicate the power level. The newly upgraded FM CHIP 2.0 has ultra-accurate power output, faster transmission speed, safer protection, and provides users with an intelligent, fast, and stable vaping experience from the inside to the outside.

The [Marvos T 80W Kit](#) is equipped with a DTL Pod. The pod tank is magnetically fixed in the shell, with a capacity of 4.5ml, which can be filled with a bottom refill system and firmly closed with a silicone plug. The top of the Marvos DTL Pod uses an innovative 810 drip tip, which is specially designed for DTL vaping needs. It is upgraded by increasing airflow and straight-through. The V-shaped groove design on the edge can prevent spit back and reduce leakage. In addition to the DTL Pod made with traditional PCTG, Marvos T also offers the Glass DTL Pod option (sold separately). The pod made of glass is stronger and more transparent and can bring a smooth suction experience. The coil used inside the pod is the highlight. It uses Freemax's patented MS Mesh Coil technology, which is inspired by the world-famous Fireluke product line. Comes with two [MS Mesh Coil](#), developed through the innovative and improved CoilTech 4.0 (tea fiber cotton formula and military-grade SS904L mesh) technology, designed to provide pure, strong flavor and produce dense clouds. In addition, the adjustable bottom airflow on both sides personalizes the airflow, resulting in an excellent DL vape experience.
