[HURRICANE MICHAEL: A Brazen, Purposeful and Catastrophic Attack on the Right!](#)

<http://stateofthenation2012.com/?p=106021>

TPTB had their geoengineers manufacture what was essentially a “hurricane tornado” of the same technological type and raw power as Hurricane Andrew. It’s common knowledge among superstorm researchers that thousands of people died during and after that cataclysmic hurricane that hit Homestead Florida in August of 1992. The vast majority of those deaths, as well as the many serious injuries, were never recorded by the state nor reported by the mainstream media. That’s the way it always is so that government doesn’t look bad. See:
