

What do I need to know about Fildena 100?

There is really nothing grand about Fildena 100mg when compared with the regular hard pill with the 100 mg active ingredient. The main difference is the product formulation (and the faster absorption) but the potency is rather similar. Patients can enjoy the same efficacy from Fildena 100 mg as the regular film-coated tablet types, although Fortune Healthcare's soft gel capsule formulation for the Filagra makes it easier to absorb (takes less than an hour) thus leaving the patients happier due to the faster-acting effect of the drug. Concerning the intake, Fildena 100 mg may be taken 30 minutes to an hour preceding any intercourse activity. Patients may take the drug with profuse amounts of H₂O. However tempting it may seem males should not take any Sildenafil medication such as Fildena 100 mg with any alcoholic beverage, recreational drugs, or any impotence product is strictly prohibited due to the danger these drugs may induce in the patients.

Filagra made by Fortune Healthcare is a very effective product from reputable drugs Production Company that have been certified by various local and international organizations. The medication is popular for its effectiveness in the treatment of erectile dysfunction. Overusing the medication can also lead to temporary loss of vision and alteration in hearing. Although the product does not have serious side effects, there is a number of side effects that you can experience while using Fildena 100 mg. Some of them include headaches, facial flushing, indigestion, heartburn, blurry vision, red yeas and back pain.

The Sildenafil Citrate housed in every Fildena 100 is the one accountable for the efficacy of the Fildena 100mg drug for erectile dysfunction. The difficulty of achieving and maintaining an erectile response in male patients can be attributed to the faulty hormone/chemical transmitter system in the patients' bodies (caused by years of chronic drug/alcohol abuse, psychological factors, disease, medication side effects, and other factors) which makes the basic sexual function an impossibility. Fildena 100 mg manufactured by the ISO certified/WHO-GMP accredited company Fortune Healthcare in India is considered as good as Viagra purple but is far less costly. The price for the regular hard pills is a little more than a dollar each, while the Super Active variant ranges the same: <https://viagrapurple.com/>

The conventional tablet form of Fildena 100 mg is to be consumed simply by swallowing it as a whole with a glass of water. Take the pill approx. 30 minutes before planned lovemaking session only once in a day. Swallow pill as a whole without altering the state of the pill by chewing or crushing in presence of complete sexual stimulation: <https://filagra.eu/fr/>

Outcomes of the medicine all depend on the strength of solution that is consumed and pattern followed for consuming it. However, proper consumption of Fildena shall allow a man to stay active for approx. 8 hours. Side effects with Fildena 100 mg are simply uncommon, but it can include nausea, vomiting, diarrhea, headaches, and rashes. Such side effects occur rarely and are nothing to worry about as they do not last for a long time and vanish soon. If you have any severe effects, consult your doctor as soon as possible.
