

DEW Beams From Military Laser Weapons are Invisible

Plans: A General Atomics artists impression, shows a laser weapon fired from the company's new jet-powered Predator C "Avenger" drone - though in reality, the laser is invisible (Image: General Atomics)

Is it a Laser or is it Microwave.?

If we promote the FOX news report as fact we must also promote that **lasers are invisible**.

Colorization of laser DEW can only be achieved with image editing as in **photoshop**.

1) Video Transcript excerpt: "When you see the movies or look at comic books or television shows - when you see the laser weapons they tend to be a color, right? Red or green or something like that. **Real lasers** - one of the key advantages they provide are that they **are invisible**. You actually can't see them. You just see this damage suddenly starting to blow something up."

2) US NAVY Laser Weapon System (LaWS) SILENT, INVISIBLE & DEADLY.

3) (12/28/2015) US military to 'begin testing **invisible laser weapons** capable of silently burning holes through targets' The 150 kilowatt class laser will be trialled in a desert in New Mexico next month, according to reports.
