

All you need to know: Smart home needs smart home products to look smart always!

Have you heard of the smart TV and gone through numerous articles on smart TV boxes or android boxes? So, it's not only entertainment that needs a bit of renovation on the smart home front but there are other options too that can make up for a good smart home. Smart home products are great but when used skilfully in a well-planned manner, it goes a long way in creating a satisfying reputation.

But there are too many. So, we have shortlisted some of the best [smart home products](#) for your home to transform into a smart home.

Type1: Safety and security

1. Smart Doorbell (Video type): This is the main step before you try to revamp the gadgets in your home. The smart video doorbell is for people who can directly have video access before you allow the perpetrator steps in. This is a magnificent smart home product, that acts as the 1st line of defense for the people living so that all annoying salespeople and strangers are kept out of the porch at all times. Purpose: It provides a live video broadcast from your front door to the doorbell app on your phone. This allows you to see and speak with the person who is standing outside your door. Guests that arrive while you're away are likewise recorded and saved by the video doorbell.
2. Smart smoke detector: It offers an additional layer of protection, where any sort of fire or smoke will let the detector blow off. The best part is whether you are at home or some

faraway place, this smart home gadget will let you know of any sort of fire or smoke in the room. It is so strong. Purpose: Much better than the traditional one and can be controlled smartly through a smartphone.

3. Smart Camera: This gadget brings your house 1st class security to your home. This gadget can send you live footage of your home, front porch, and backyard wherever you have installed it. But all you need is a good wifi connection to make the deed done. Purpose: Apart from image and sound footage, it offers additional attributes like 2-way communication, geo-fencing and even faces tagging.

Type2: Convenience

1. Smart plugs: Smart plugs are very handy and you do not have to rob a bank to get some. They're plug-in outlets or power strips with mobile apps that link to your home network. They do a good job of turning your existing gadgets, such as lights or fans, into smart ones. Purpose: Easily transforms and control the simple gadgets of your home with a simple smartphone.

Type3: Entertainment

1. Smart TVs: This gives an opportunity for people to access more entertainment channels without browsing through thousands of channels with no picture, or any kind of sound or music. It does not use an antenna or a cable to display content, so less trouble at houses and hotels if you are planning to install it. Purpose: Offers a whole new level of entertainment channels and even has control of your social media pages too. So, it works like the phone but on a bigger screen.
2. Smart speakers: It comes with [voice assistant](#) support that supports a hundred different languages across the globe. So, if you're in a city or town, this can be the quick answer to your prayers. It's simple, affordable and readily available online. Purpose: Play music, listen to the news, and connected through phone, tablet and laptops to play content with better sound quality.

Final words

If you are planning on revamping your home, these gadgets are the best shot- simple, friendly to install, affordable and easily available on shopping portals (may be on huge discounts).
