- **The layer feature** is awesome and offers designers comfort without cluttering the drawings while working on different aspects including, plans, floors, walls, elevations, electricity, plumbing, and others.
- **Symbols** are ready to use and save you from repetitions and missing standards in your drawings.
- **APIs** allow you to add plug-ins and 3rd party software to extend your [CAD conversion capabilities](#) in terms of features and functionality.
- **Cloud storage** is the safest option from the loss of files or impacts of disasters.
