

# Grofers clone app:An amazing aid to manage Grocery delivery business

COVID-19 has had major impacts in all fields. The retail industry is unable to keep up with the ongoing demands. This has propelled the growth for grocery delivery apps on a global level. As per the French Retailer, there has been a 600% increase in growth in the grocery delivery app sector. In the US, Walmart Grocery, Shipt, and others are experiencing a growth rate of 218%, 160% and 124% respectively in a single day. Grocery clone app development is anticipated to have immense growth potential in the current period. Entrepreneurs can utilize the ongoing trends to their best advantage and invest in [Grofers clone app](#).

## Features of on-demand grocery delivery application

### Admin panel

**Dashboard:** This module in Grofers clone script helps in tracking each order separately. Admins can enter each id then view the status of the order. It is an efficient tool as the admin can keep track of the orders in case of demands.

**Assign managers:** Admins can allocate managers and offer functionalities for each manager to operate on.

**Order management:** As and when the orders get processed the details are updated in the order management panel. It gives the admin leverage to access the orders and offers better services for customers.

**Advanced reports & analytics:** It represents the profits made in various sectors in graphical manner so admins can evaluate their present business profits and take the required actions.

**Online payments:** Grofers clone app offers a variety of online payment modes so customers can choose the digital payment mode as per their needs and make the payment. These details are instantly updated in the admin panel.

These are some of the effective ways to manage your business through grocery delivery apps solutions.
