

# Purchase Lovegra Tablets Online for Female Sexual Dysfunction Treatment

There is a stigma associated with sexual dysfunctions as many believe that only men can fall victim to the effects of these kinds of disorders. This is not true as women experience female sexual dysfunction (FSD) that can affect their sex drive and the pleasure experienced when involved in sexual activity. Fortunately, there are **women Viagra pills** known as Lovegra that can successfully treat this condition.

FSD causes a woman to experience a lack of sexual desire or interest in sex as well as the difficulty in becoming aroused. This can negatively influence their romantic relationships as their partner may misunderstand these symptoms and believe that they could be caused by a loss of love or desire within the relationship.

Fortunately, **women Viagra pills** are available online and can help to reverse these symptoms and make sex more enjoyable for both parties involved. Once you have bought your **Lovegra tablets online** you can take them with some water approximately 30 to 45 minutes before you wish to experience the effects brought on by the medication.

Once the medication is active it will remain effective for 6 hours long and enable the user to feel a boost in sexual desire, lubricant produced and sensitivity experienced during sex. Woman can experience these effects at any point during the 6 hours as long as they are sexually stimulated or aroused.

## **Are Women Viagra Pills Safe and Effective?**

**Lovegra tablets online** are safe to use and have been deemed so by the FDA. This means that multiple groups of medical professionals have each tested the medication and have confirmed that it works as a treatment for FSD.

However, while the medication is safe to use for the majority of woman over the age of 18, it should not be used when pregnant, breast feeding, consuming alcohol, or with other medications that contain nitrates, when taking alpha blockers or heart medication, have heart, kidney or liver problems or are suffering from retinitis pigmentosa.

**Lovegra tablets online** also cause side effects that are experienced by few users. These side effects are usually mild and can be treated by ensuring that the correct dosage is used or by stopping usage of the medication. Side effects that some may experience are an upset stomach, nausea, headaches, facial flushing, nasal congestion, changes in vision and sensitivity to light.
