Owing to the rising demand regarding smoked sausages, smoked salmons, and several other food delicacies, the global liquid smoke market is also foreseen to develop in coming years. Liquid smoke is used as browning agent, color preservative, and anti-microbial additive. This is another factor supporting the growth in liquid smoke market across the globe. The manufacturers are using liquid smoke to provide a distinct factor to their food products. Owing to rising demand regarding surged composition of carbonyl based compounds, as an effective browning agent, the global liquid smoke market is estimated to witness a notable rise in future. Based on products, hickory, mesquite, maple, oak, and Applewood are the key flavors in the market. Among these, the hickory segment is likely to experience the maximum demand in coming years. The chips and sawdust of hardwood, for example, hickory is extracted as waste from furniture sector. This smoke is sans additives, salt, and other carcinogenic compounds and helps liquid smoke market to grow.
