

# LVDT, Linear Gauge Sensor

[LVDT](#), or Linear Variable Differential Transducer, is an electromechanical transducer used for precise position measurement in various industries like subsea, power generation, aerospace, and more.

**ONOSOKKI | INDIA**

## Linear Variable Differential Transducer (LVDT) uses across different industries

- ▶ Industrial Automation
- ▶ Quality Control and Metrology
- ▶ Material Testing
- ▶ Geotechnical Engineering
- ▶ Aerospace and Automotive
- ▶ Research and Development
