

Teeth Sensitivity- causes, treatments, and home remedies

Teeth sensitivity is a very common thing but fortunately sensitive teeth can be treated. If you have ever felt that short and sharp discomfort on your teeth every time you take cold water, sweets, or sometimes even on simple rinsing with water, the sensitivity is often perceived as pain and it is temporary. Now, why does that discomfort occur? This is due to teeth sensitivity but many people are unaware of this problem. Most people have experienced teeth sensitivity with different levels of intensity which may remain or disappear after some time leaving the people confused that why they are feeling this sensitivity. Finding the source of teeth sensitivity is important to recommend the treatment.
