If you are looking for lighting units that will provide sufficient illumination in large commercial buildings with high ceilings. Our small but high-quality selection of low-cost high bay lights in Australia. LED Envirosave was created by an electrician that has been involved with light emitting diode products since 1995 in Newcastle. We install LED lights throughout Australia and have completed installation for various clients over the years such as chemists, cafes, residential properties, smash repairs and caravan parks. We back our products and technical information, service and warranty. All of our products carry a warranty varying from 2 to 10 years for peace of mind. We import top quality lamps and fittings with c-tic and SAA approvals as well as sourcing from Newcastle and all over Australia. As well as a fantastic range, we pride ourselves of prompt, professional service that leads to many referrals and return clients.
