

Jewel Stone Floors

[Decorative concrete](#)

A cement-based coating, Jewel Stone is ideal for a variety of surfaces, including patios, walkways, steps, and pool areas. The material's non-slippery surface makes it perfect for these areas. It's versatile enough for interior and exterior use and is suitable for both old and new concrete. A sealer will extend the lifespan of Jewel Stone flooring making it easy to maintain. Additionally, Jewel Stone can be used to revitalize worn concrete.

The Select selection of Jewelstone mosaics combines gemstone and vibrant glass. Obtainable in seven shades, from the calming Pearl towards the vibrant Sky blue, these tiles are suitable for a number of interiors. The number is made to complement current interior design trends, and it is available at competitive prices. You can even decide to have both floors and walls covered in the same material. What is actually more, these come in a number of sizes.

A unique feature of Jewel Stone is its ability to transform concrete into a masterpiece. As well as the color and pattern from the flooring, the system also comes with decorative stencils that allow you to create unique designs. Having a number of designs to select from, there is nothing you can't find. Plus, the stencils can be custom-made and cut according to your needs. The options are endless. You'll be impressed by the end result.
