

Volumetric Display Market Dynamics Influenced by COVID 19 Outbreak, Business Trends, Competitor Stra

Market Research Future (MRFR), highlights that the Volumetric Display Market Outlook 2020, Business Insights, Rising Opportunities & Regional Demand by top Vendors: Seekway Technologies, LightSpace Technologies

Market Scenario

Market Research Future (MRFR), in its latest report volumetric display market 2020 reveals, the impact of pandemic on the market. Other crucial forces that can bolster the expansion of the volumetric display market can be discussed vividly in the report. As per MRFR analysis, the expansion of the volumetric display market can be at about **34% CAGR** across the review period. The volumetric display market value can rise at **USD 747 Mn** across the forecast period 2017-2023. The growing implementation of 3D volumetric display technologies can underpin the expansion of the volumetric display market.

Market Segmentation

The segment study of the global [volumetric display market](#) is done by display type, end-users, components, and application.

The display type based segments of the volumetric display market are oscillating, multi-planar volumetric, rotating, swept volume display, static volume display, and others. The swept volume display segments are rotating led array, vari-focal mirror, rotating flat screen, and static volume. The static volume segments are gas medium up conversion, laser plasma 3D in air, solid state up conversion, and layered LCD stack among others. The increase in applications of swept volume display in different sectors can impel the expansion of the volumetric display market in the years to come.

The component based segments of the volumetric display market are screen, memory, lens, and others. The surge in utility of screen volumetric display can gain high revenue for the market in the years to come. The increase in the rate of deployment of lens volumetric display can push the expansion of the market in the years ahead.

The application based segments of the volumetric display market are production and management, data visualization, design and prototyping, marketing, training and others. The high utility of design and prototyping for volumetric display can underpin the expansion of the market across the study period.

The end-users based segments of the volumetric display market are healthcare, aerospace, automotive industry, education, gaming and entertainment, and military & defence among others. The growing number of volumetric display solution users in education and gaming sector can boost the expansion of the volumetric display market in the years to come.

Key Players

Seekway Technologies (China), LightSpace Technologies Inc. (U.S.), 3DIcon Corporation (U.S.), Voxon (U.S.), Alioscopy (France), Holografika Kft. (Hungary), HoloXica (U.K.), Zebra Imaging (U.S.), Burton Inc. (Japan), Actuality Systems, Inc.(U.S), LEIA Inc. (U.S.), Burton Inc. (Japan), and Soscho GmbH (Germany) among others are some major volumetric display developers.

Detailed Regional Analysis

The regional study of the volumetric display market and ongoing trends and growth opportunities are of the market are studied across Asia Pacific, North America, and Europe, following the Rest of the World. North America volumetric display market can lead in the worldwide market as it is expected to have the largest share of the market across the review period. The regional volumetric display market can surge at high pace due to rise in the need for technological innovations and 3D displays.
