

## [Snæfellsnes Peninsula – Private Day Tour](#)

Visit Snæfellsnes with one of our fun local guides

and discover the picturesque landscapes around the volcano Snæfellsjökull. This area is now a National Park, but it is the setting of the Jules Verne novel “Journey to the Center of the Earth”.

There are weird basalt rock formations along the trail between Arnarstapi and Hellnar. Blowholes, birds and sheer cliffs of lava. One of the nicest formations is an arch or gateway located at the trail's head name Gatklettur.
