

## Installation Stair Lighting

We design and implement automatic LED lighting systems for stairs, furniture and other structures. Automatic stair lighting with motion sensors is a finding of modern electric engineering which allows the owners of multi-layer apartments and country houses possess the “smart” lighting actuating at the moment of motion along the staircase. Smart stairway lighting sequentially illuminates every step when going along the staircase at night. Automatic step lighting allows making the stairway comfortable and safe at night, converting it into a masterpiece creating a special atmosphere in your house. [Installation Stair Lighting](#)
