

## Campus Facilities – Laboratories

**English medium school in bangalore** have built laboratories for various subjects including Physics, Chemistry, Biology and a Language lab. Performing experiments enhances practical application and learning in students. Chemistry is made more interesting with multi-coloured gases and liquids. Children enter the fascinating world of Biology and study the parts of the human body, animals and plants, first hand. Our language lab helps students in grasping the phonological aspects of a language and they are trained in terms of vocabulary and pronunciation. At the School, we have state-of-the-art laboratories to help children understand crucial concepts better.
