

# Uber India's tech team builds products for global markets

Ride-hailing goliath Uber's tech process in India began in 2014 at a home in Jubilee Hills, Hyderabad. This has extended throughout the years to a place where its tech habitats in Hyderabad and Bengaluru are presently its second-biggest on the planet, next just to its offices in the US. The two habitats handle basic capacities for [Uber](#), for example, rider designing, Eats designing, infra-tech, information, maps, Uber for Business, fintech, client fixation, and development and showcasing.
