

# Canon EOS R5: Now Capture Photos with Perfection

## Introduction

Canon EOS R5 is here to ensure perfection in photography. This camera is one of the most perfect flagship mirror glass cameras. It is a full-frame mirrorless innovative camera that comes with interchangeable lenses. It is one of the best in the [Canon EOS R](#) system ranges. This product is not considered as a successor of any previous model but is one of a kind with its revolutionary technology.

This product has debuted in many teasers by featuring its all-new 45-megapixel full-frame CMOS sensor. The price of this product varies in different countries. The EOS R5 is an excellent 8K video camera. This camera comes with innovative technology to capture pictures with precision and perfection.

It is powered by a DIGIC X image processor. These technological advancements help this camera to record up to 8K resolution videos at 29.97fps. All this can be done internally without

the requirement of any external recorder.

If you don't prefer to record videos in 8K, then this camera comes with a feature for you to record videos in 4K with up to 120fps. If you are a person who wants to record externally then you can also do it with up to 4K at 59.94fps.

This fact about this camera will definitely impress you. It is an efficient camera that can record all of its videos internally on both of its memory cards. It comes with CFexpress and one SD UHS-II. But the 8K raw can only be recorded on CFexpress.

If you wondering about what is at the back? Then answer to it is its new display that comes with a viewfinder. It has a 3.15 inch panel display that has 2.1 million dots on a fully articulating arm and a touchscreen. The viewfinder is a 0.5 inch OLED that has 5.76 million dots and a 120Hz refresh rate.

## Features of Canon EOS R5

The Canon EOS R5 comes with an excellent design that makes people speechless. It is one of the best [mirrorless cameras](#) with an excellent 8K video recording support. The 45-megapixel sensor helps it to deliver a great dynamic range.

It has both electronic shutter and mechanical shutter which supports it for continuous shooting up to 20fps and 12fps. If you go more into its specification you can find Canon's Digic X image processor offers an ISO range of 100-51,200 and is expandable to as high as ISO 102,400.

Here is another best feature of this camera. It has the next-generation dual pixel CMOS AF II autofocus technology. This technology has been upgraded from the Dual Pixel CMOS AF. It also offers 100 % autofocus coverage area.

This means that while capturing a photo you can focus at any part of the frame. The AF point has also been increased to 1053 on the EOS R5 and manually offers 5940 selectable AF positions.

The face tracking feature of EOS R5 is very effective. It comes with eye-detection AF. The AF priority mode is available for both people and animals. If you love wildlife photography then it is a great choice to buy.

Now we are writing about one of the key features of Canon EOS R5. It's the mirrorless feature. This feature helps in-body image stabilisation which is designed to perform in conjunction with optical image stabilisation (OIS) of the lens. It is a great camera that effectively offers up to 8 stops shutter speed and operates all EF and RF series [lenses](#) with the IS or non IS category.

Do you want to capture 8K videos at 30fps frame rate? Then you can do it with the help of EOS R5. It comes with a full sensor readout. This feature offers you the option to crop your 8K footage at the time of post-production. This camera also allows you to record 8K raw videos internally without the need for any type of accessories.

It also provides you with the option to record 4K videos at 120fps. Canon EOS R5 gives you the format options to select from like RAW, H.265 HEVC, and H.264 MP4 in either ALL-I or IPB compression option.

When it comes to connectivity then EOS R5 can't be matched. It has dual-band wifi as well as the Bluetooth V5.0 which is included with Bluetooth low energy support. It has USB type C and HDMI micro ports and a 3.5mm headphone connectivity feature.

It offers you the support of FTP and FTPS to transfer your image data or through the FTP server directly. Cannon also offers its users with the feature of cloud storage access to help them to store their content in the virtual space for up to 30 days with no limit on the size.

This camera has a varied angle LCD monitor that comes with touch support and a top LCD panel for easy and quick control. Another big feature of this camera is its dual memory card slots that have CFexpress and SD card functionality. Its magnesium alloy body makes it water and dust resistant. It weighs around 738 grams with a battery and SD card.

Here is a quick look at its features

1. HDR videos with a colour depth of 10 bit
2. It comes with 100% AF coverage
3. It has got a 45 megapixel sensor

4. It supports 8K video recording

5. Offers ISO range of 100 - 51200

## Conclusion

The Canon EOS R5 is a piece of art in the mirrorless camera market. This flagship mirrorless camera is an excellent device to capture your precious moments and save it for a lifetime. It has a beautiful attractive design with revolutionary features that no other mirrorless camera offers.

One of its key advantages is the feature of recording 8K and 4K video at 120 fps and more. This camera is created to help you take pictures with perfection. Enjoy professional photography and upgrade your skill of photography with this innovative camera.
