

Ideal Free Android Apps for Smartphones

Android was made especially for cellular phones and it was released in 2008. Within a few years of the release, it is the 2nd hottest main system for smartphones and tablet devices. Aside from the applications that can be purchased, you can find scores of apps in Android market for download at no cost. We may discuss some of the best free Android apps that exist for that Android users on the mobile phones.

Android app store, at the moment, is stocked using more than 500,000 apps, a few of which are absolutely free. The interest rate from which apps for Android are now being developed is significantly higher than the app development rate for almost any other operating system for mobile phones.

Perhaps it might be appropriate to begin with Adobe Reader app for smartphones. This free app is amongst the most downloaded and most popular Android apps and runs equally efficiently on smartphones and also tablet devices. Adobe Readership a necessary companion for any person who must download and read books with their cell phone.

After Adobe Reader comes the free social network app for Skype. This app has gained much attention in a really short time. Skype facilitates VoIP calls from the mobile within affordable rates and with an extremely decent quality. Users may also engage in free of charge Skype-to-Skype video calls, that miracle traffic bot is the foremost.

Google maps could be the next from the list, which similar to other products from Google, is simply awesome. Even if this app is commonly a must have, for those users who usually remain mobile and still have to search a lot this app ought to be the main priority. Furnished with free and voice-guided GPS, this app makes certain that you won't ever go missing on your journey.

With all the rise of social network, the apps developed specifically for this purpose a variety of and positively hold a prominent place among the finest free Android apps. Two such amazing

apps are Twitter and facebook applications intended for mobiles. These applications have already been optimized for your smartphones and tablet devices and offer a really simple to use interface which really doesn't allow you to feel any difference in the original versions.

Similar may be the case together with the latest YouTube app for Android phones. Initial form of this app needed some improvements and people improvements are already performed within the new edition. Together with the new edition, users can savor the video streaming and watching experience just the way they actually do on the computers.
