

## How to calculate the resistor value of LED (with different types of LED circuits).

### [How to calculate the resistor value of LED \(with different types of LED circuits\).](#)

How to calculate the resistor value for different types of LED circuits This tutorial will help you find the correct value of one or more LED resistors (or resistors) to connect the battery. If you choose this topic, you will be able to: Calculate the value of the resistors for the circuit diagrams of various... [Read More »](#)
