

ITOH DENKI's Dc Motorized Roller | Seimitsu Factory Automation Pvt Ltd

The Itoh Denki's introduced power Moller in industry first time which is a self-contained motorized roller that opens new options in handling system design. Its compactness easy installation makes it the perfect choice when efficiency and space savings are required. Its components like internal motor, planetary gearing and affixed roller tube helps to turn the force through shock absorber. The tube rotates because output shaft holds by in same position by conveyor frame.

SEIMITSU is a renowned supplier of Itoh Denki's Power Moller in India and authorized distributor of Itoh Denki, Japan.
