Desirable Qualities

Visually Appealing:

Black Beauty Granite has a luxurious feel to it. It can give any room or space it is incorporated into, a high-end look. You might be interested in checking out our [black worktop](#) collection if you are looking for anything dark to add personality to your space.

Black Kitchen Are Scratch Resistant:

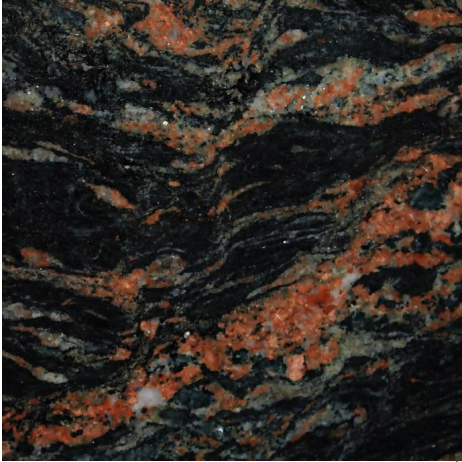

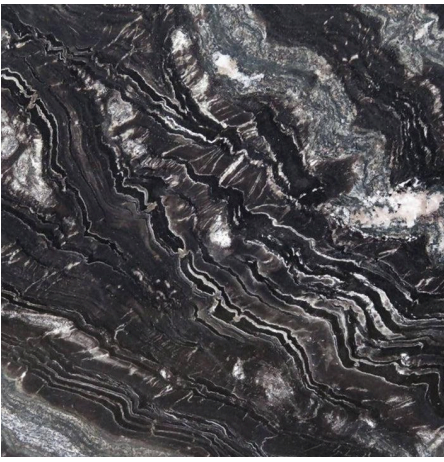

Granite is one of the hardest worktop materials. Since it is resilient to scratches, it makes an ideal surface for everyday use. The kitchen being one of the busiest places in a house that involves regular use of cutlery and heavy appliances, it is safe to say that black beauty granite worktop is worth investing in.

Black Kitchen Countertops Are Heat Resistant:

In general, granite worktops can easily withstand heat up to 480°F and possibly up to 1,200°F. However, direct contact for prolonged periods is discouraged as it could discolor the worktop

surface. It is therefore recommended to use trivets or heat coasters to ensure the longevity of this black granite; Black Beauty Granite.

Highly Durable Granite Black:

Apparently, granite worktops can last for up to 3 decades or more, with proper maintenance. To be honest, it may even last longer than one's home. Granite worktops are sturdy and long-lasting as long as they are sealed annually. So, the formation of fissures and cracks is the last thing to expect on the surface of their kitchen or bathroom worktops. However, it is common knowledge that poor mishandling can cause damage.

Black Kitchen Tops Has Low Maintenance :

Besides the need for annual sealing, granite worktops and surfaces are fairly easy to maintain. They fall under the lower maintenance category of stone worktops. They just require a basic daily cleaning which is as simple as that required for [quartz worktops](#). One can use a soft cloth soaked in a pH-neutral cleaner or warm soapy water to wipe out the dirt and dust. This is to be followed by dry wiping to prevent watermark formation.
