

# Patch up people with your businesses by launching Uber for X clone.

Technological headway has uplifted many businesses to incorporate smarter features. Correspondingly, people are getting acquainted with [On-demand service apps](#). This trend will show a sharp increase in the near future. So, if you are planning to step into providing on-demand services, you have landed at the right place.

At Turnkeytown, we have a proven track of building successful clone applications. We develop clone applications for almost every popular app out there. But we differentiate ourselves from others by providing custom-built features.

Our Uber for on-demand services include several mandatory features. In addition we include some of these features too:

- **Estimated time of arrival-** This feature enables users to know about the estimated time of arrival, even before booking any particular service provider.
- **Smart routes-** The app has an inbuilt smart route tracking feature, that shows the shortest route possible to reach the destination.
- **Multi-language support-** When it comes to any business, language should not be a barrier. The app is built to support almost every language.
- **In-app chat/call option-** Users/delivery persons can make use of this feature to talk to each other in case of any queries. This avoids the need to share mobile numbers.
- **Centralized admin dashboard-** The admin is responsible for managing the in-app functions. Right from account verification to order verification, admin handles all from a single dashboard.

## Conclusion

We provide Uber for X clones with every advanced feature to make you stand out from your competitors. In addition, our solutions are white-labeled, so that you can rebrand it to fit your business.
