All DLC : Lets – [Zippy](#) – [Gofile](#) – [1File](#)

Password: DLPSGAME.COM

Notes (@CyB1K) : Released together with Fugazi! Tested on 5.05 and 9.00! After a lot of issues, lot of testing, lot of work, lot of demandings and lot of everything. Here it is. You will have to READ this if you want things to work, CODs are special requirement games. You NEED all the DLCs for it to work, it checks for ownership in them! Although i patched most of the annoying stuff its still a pain in some cases. FIRST thing you have to do is DISABLE the streaming textures (Sorry tried to disable it via code but it wasnt possible), this will softlock the game if NOT done! To start campaign with internet connected simply cancel all the joining sessions and login to... and then press go offline. If you dont have internet connected spam X until it tells you to go offline (Thanks Lapy for his struggle and testing of this, i did patch the internet requirement but its still a pain). You will be signed in as CyB1K in the campaign! DO NOT ask me for a newer update, it has new keys and i dont have access to them. DO NOT ask me for another cusa i wont do it! Meri Kurisumasu!

Massive thanks to jocover for his insane support on returning the right values to functions in order to trick the game!

Credits to DeathRGH for his code to unlock all multiplayer maps (Its all locked by default, when offline)

Thanks to Franky, The World ismine and Kameleon for helping with the game absurd cost!
