

Bubble Sheet (Answer Sheet) Templates

[Bubble Sheet](#)

First, Produce. Then it's just Print, Scan, and Export!

Gone are the days of having to purchase multiple software packages and learn multiple programs to look after those needs: FormReturn does it all to you, in a single, efficient program.

And the best part? You won't need to buy a big expensive bubble-scanning machine to use with our applications. Does FormReturn let you produce printable bubble sheets with ease, it can analyze your completed forms simply by scanning them with a typical picture scanner.

Instructional Clip Art Images

We've also included clip art graphics that provide instruction for proper technique to shade in the shape. If you're curious, they may be downloaded onto the clip page.

Really Quick Start to Designing Bubble Sheets

To begin right away at designing your bubble sheets, go ahead and download your free 30 day trial copy of FormReturn. As soon as you've set up the program, begin the program and look for the "new section button." Clicking this will let you build your own sheet. You'll then have the ability to click on the checkbox instrument, and will discover that A, B, C, D, and E appear automatically. Should you would like to edit that, just double-click on the checkboxes. To evaluate the optical mark recognition (OMR), just use the line tool to draw a few lines across the page and click on the "recognition preview tab," followed by clicking, "detect marks" -- you will instantly have the ability to notice the software discovering what you have drawn!
